ANDROID TV™

SMARTCENTRAL™

STUNNING 4K ULTRA HD RESOLUTION

With stunning 4K Ultra HD resolution, built-in upscaling and vivid color, anything you watch on the AQUOS UH30 will look amazing. Boasting four times the pixel resolution as Full HD, the AQUOS UH30 series also comes equipped with SPECTROS™ Rich Color Display, which provides a 21% wider color spectrum than conventional LED HDTVs. With more shades of red and green, you experience more realistic landscapes, lush nature scenes and natural skin tones.

The AQUOS UH30 with Android TV allows you to watch a movie, listen to radio or queue up your favorite jam with Google Play™ and your favorite apps. Android TV brings great content to you, so you can spend less time browsing, and more time watching. The AQUOS UH30 is Google Cast™ ready, so you can cast your favorite entertainment from your personal device on to your Sharp television.

This series will also include SmartCentral™, which enables consumers to browse and search cable, satellite and streaming services from a single screen.

The Sharp AQUOS UH30 comes packed with unique picture enhancing technologies: AquoMotion™ 960 for reduced motion blur; and AquoDimming™, which controls each pixel to reveal more detail in dark areas—providing an amazing picture every time. The 70" (69 1/2" diag) AQUOS UH30 has achieved THX® certification, so it has passed 400+ picture quality tests, ensuring every pixel delivers precisely the scene the director intended.

Easy connectivity is at your fingertips with all four HDMI® inputs equipped with the latest 4K specs, an SD card reader and built-in Wi-Fi® and Bluetooth®. The sleek, modern design gives a near-frameless look, and a dual stand option allows it to be positioned to fit your furniture.

¹ Compared to traditional LCD TV
