Compatible with JPEG/TIFF/PNG/GIF/BMP.
* Comes with dedicated software.

in the field and studio. for superb results.

■ Use the Multi-view Display Function to Preview Materials and Production Screen on a Single Monitor

Multi-view display enables simultaneous split-screen preview with a single monitor, so you can reduce the number of monitors required. Split-screen segments labels may now be selected or edited. Labels may also be turned off or adjusted for 5 levels of brightness. The label background "band" and frame outline may also be turned of, and the frame brightness is adjustable through 5 levels.

Example of conventional monitor system

Connection of separate monitors is required for each input, PVW and PGM.

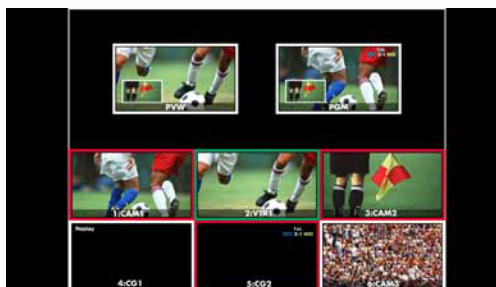

* The image shows loop-through outputs connected to switcher inputs.

■ Selectable Split-screen Quantity and Location

- The number of split-screens can selected from 10,8, and 4.
- Display of red/green tally indications in frame can be displayed.
- Split-screen labels may customized or selected from menus.
- When splitting screens into 10/8 sections, the upper 2 windows may be selected from PGM/PVW/AUX/BUS/KEYOUT images.

Multiple Effects for Stunning Results

In addition to standard wipe patterns, the DVE allows you to utilize squeeze, slide effects, and different types of 3D. The 3D DVE effects (i.e. page turn) are also applicable to the key function. Keyer functions include a luminance key, chroma key, and DSK. Furthermore, the AV-HS400A offers an additional, even greater range of visual effect key functions brought to life with the flying key function, enabling easy key position and size adjustment. Enhanced key functions include omnidirectional edge control in 45 degree increments, and a simplified 2nd PiP (Picture-in-Picture.)

A total of 43 effects offer great creative flexibility
